

# The Natural Advantage of

# NORDIC LAM™

Resource friendly, made from 100% black spruce, glulam products from Nordic Engineered Wood provide the dimensional stability and high strength reliability builders need in residential, commercial, industrial and architectural construction.

Recent projects demonstrate the design flexibility of Nordic's products. Nordic Lam™ beams, headers, columns, tall wall studs, and our latest innovation, the NI-90x I-joist series provide price- and performance-based solutions for all your design and building requirements.

Nordic's glulams and I-joists feature an exclusive Enviro≡Lam™ technology, a unique fibre optimization process that minimizes waste and converts more of nature's raw material into useful products than ever before.

*Visit us at Booth 120 in the Canadian Wood Council section, and discover how Nordic products can work for you!*
