

Let **NORDIC I-PLAN** build for you!

**Reduce design time, save money
and decrease jobsite waste
with an integrated, user-friendly
software program from Nordic.**

NORDIC I-PLAN is an analysis and design tool that provides detailed structural framing layouts with high precision and expediency. As a valued Nordic customer, your focus is on profitability. Nordic's single interface design software provides accurate take-offs while minimizing input time.

NORDIC I-PLAN will help you achieve residential and commercial projects on time and on budget with real cost estimates and pricing levels. From component sizing to multi-level framing systems, **NORDIC I-PLAN** can help builders manage and control expenses through improved construction efficiency. For example, material waste can be reduced by accounting for all building components required for specific structures.

Customized to Nordic Engineered Wood products, this proprietary software from Nordic is an engineering design vehicle that requires less of your technical involvement. **NORDIC I-PLAN** will deliver reliable design solutions with the quality and speed that today's competitive market demands.
