

Nordic Engineered Wood presents

# A Table of Contents

of its products and capabilities

# 1

## NORDIC JOIST™

**100% tension tested MSR flanges: ideal for home and commercial use**

Nordic I-joists are manufactured in a variety of depths and flange widths, promoting design flexibility for any residential or commercial application.

# 2

## NORDIC LAM™

**Economical and versatile in framing applications**

Nordic Lam beams and headers are manufactured in both I-joist compatible and conventional lumber depths. Nordic Lam columns are a cost-effective, reliable alternate to size built dimensional lumber columns.

# 3

## RIM-BOARD

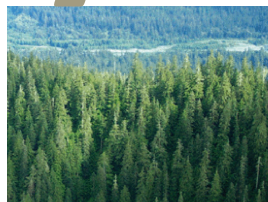

**Proven performance in today's engineered floor systems**

Precision trimmed, rim-board serves as a perimeter band designed to carry vertical and lateral loads.

# 4

## ENVIRO=LAM

**Securing our future with responsible forest management**

Nordic's exclusive Enviro=Lam technology minimizes waste and converts more of nature's raw material into useful products than ever before. The process contributes to natural resource conservation by extracting more valuable fiber from every tree.

# 5

## BLACK SPRUCE

**Over 2 million acres of sustainable timberlands**

Known for its light weight, fiber density and narrow growth rings, the black spruce highlights Nordic's high strength product lines. An intensive, ISO 14001 certified, environmental management system assures biodiversity and perpetual growth cycles.

# 6

## MANUFACTURING

**Optimized fiber, uncompromising quality**

Nordic's high strength, cost-effective family of building products are manufactured in one of North America's finest state-of-the-art facilities. Each piece of lumber is machine stress-rated ensuring consistency and structural integrity. Only lumber that exceeds 1650f MSR is used.

# features

## Design solutions for Tall Walls exceeding code limitations

From roof to ground, the Nordic Tall Wall System is the builder's choice when strength, dimensional stability, straightness and quality are critical.

## Architectural projects

# 8

Nordic products add value to any construction project – enhanced atmosphere and comfort through superior acoustics, optimal use of space and stylish architecture.
